Problem Statement

- **"Around 70% of Data Breaches Occur Due to Unawareness About the Terms & conditions of service, From Facebook-Cambridge Analytica to Whatsapp Privacy Issue. Most of the Time These Legal Documents are Gigantic Enough for Normal User to Compile & Understand."**

- **"Reading Long Documents/Articles Can Be Time Consuming & often Cumbersome if Text is Large Enough."**

readwrite

Very few people actually scroll through the fine print before checking off the "I agree" box.

Back in 2012, Siegel+Gale's survey results revealed how confusing legal agreements could be. It found that people could answer only 40% of the questions about an agreement they had time to study. In 2017, two researchers watched as hundreds of college students agreed to give a fictitious social media platform their firstborn children (a clause in paragraph 2.3.1). Complex terms of service are more likely to be dodged than decoded. So what can be done?

Spanning 14,000 words, **Facebook's terms and conditions** are hardly succinct, so if you're one of the platform's 1.4 billion daily active users you may want to think about whether you properly understood what you were signing up to. Especially in the wake of the Cambridge Analytica scandal.
